4 000W solar panel price

Overview

In 2025, a 4 kW solar panel system costs around \$11,200 before incentives, based on real installation data from across the country. But your actual price will depend on factors like your roof's complexity, local labor costs, the equipment you choose, and what incentives are. Optimal System Size for Most Homes: A 4000W system generates 300-750 kWh monthly depending on location, making it ideal for households using 800-1200 kWh monthly while requiring only 230-320 square feet of installation space. Significant Cost Variations by Configuration: Grid-tie systems start at. A 4 kW solar panel system is enough to power a small home—but it'll cost you about \$11,200. This translates to approximately 300 to 750 kilowatt-hours (kWh) per month depending on your system choice, location and other factors. Only 14 left in stock - order soon. However, prices have significantly dropped in recent years, making solar energy more affordable than ever. By continuing, I agree to the and authorize you to charge my payment method at the prices, frequency and dates listed on this page until my order is fulfilled or I cancel, if permitted.
