# Accra electric vehicle policy

## Overview

---

15, GNA - To reduce the effects of climate change and commit to environmental sustainability, economic growth, and global climate goals, President Nana Addo Dankwa Akufo-Addo, has on behalf of the Ministry of Transport launched the National Electric Vehicle (EV). Accra, Dec. In a news brief. The adoption of electric vehicles (EVs) and associated infrastructure is a critical policy priority for the Government of Ghana as it transitions towards sustainable and environmentally friendly transportation. This forms part of the country's strategy to transition toward sustainable transportation and reduce greenhouse gas. The views expressed in this publication are those of the authors. We regret any unwitting errors or omissions. This publication provided acknowledgement of the source is made. The National Electric Vehicle Policy is expected to provide market signals and help to decarbonize the transport sector in line with Ghana's National Energy Transition Plan 2022- 2070 and global commitments. As part of the Energy Commission's mandate to recommend national policies for the development and utilisation of indigenous energy resources, the Commission in collaboration with the Ministry of Energy started promoting electric vehicles to create demand and drive the productive utilisation of our.
