Alofi grid-side energy storage project

Overview

The 101 MW/202 MWh grid side energy storage power station in Zhenjiang, Jiangsu Province, which was put into operation on July 18, 2018, is currently the largest grid side energy storage power station project in China and the world's largest electrochemical energy storage. The Alofi Home Energy Storage System is transforming how families manage energy, offering a seamless blend of sustainability and cost-efficiency. With global electricity prices rising by 18% since 2020 (see Table 1), homeowners are increasingly turning to battery storage solutions to take control. This energy storage station is one of the first batch of projects supporting the 100 GW large-scale wind and photovoltaic bases nationwide.
