

PEES Power Systems

Are photovoltaic panels with built-in cleaners good

✓ 50KW/100KWH

✓ HIGHER POWER OUTPUT
IN OFF-GRID MODE

✓ CONVENIENT OPERATION
& MAINTENANCE

✓ PRE-WIRED

Overview

Dust and debris can affect solar panel efficiency to some extent, but is it worth opting for a cleaning service or cleaning them yourself?

Let's find out. Does Cleaning Solar Panels Make a Difference?

Yes, it does make a difference by improving their performance. While these powerful energy generators are designed to be largely self-cleaning, the question of whether regular cleaning is necessary isn't as straightforward as it. While going solar is pretty much a "set it and forget it" way to power your home with renewable energy, depending on where you live, you'll still need to clean your solar panels once or twice a year to ensure you get the maximum energy benefit from your solar investment. But over time with exposure to the elements, they accumulate dust, pollen, bird droppings, leaves, and pollution particles, all of which can get in the way, preventing sunlight from reaching the cells and compromising.
