# Are there any traps for Party A in photovoltaic panel leasing

## Overview

---

After reviewing the 25-year lease contract, it's clear that it's designed to lock homeowners into a long-term commitment that benefits the leasing company far more than it does the customer. Here are the biggest traps and pitfalls buried in the fine print: 1. Solar leasing helps many people reduce their energy bills without the upfront cost of purchasing and installing new home solar panels. Leases and power purchase agreements are two similar. What is solar leasing?

A solar lease is an agreement between a third-party developer that installs and r house and you sign a contract to use the system. Contracts often las 20 years or more. Why trust EnergySage?

When comparing your solar financing options, one question that often comes up is whether you'll be able to take advantage of tax incentives.
