Big panels hidden under photovoltaic panels

Overview

Transparent solar panels work on the basis of conventional solar panels by absorbing photons from sunlight and converting them into electricity. Unlike traditional solar panels, which are visibly mounted on rooftops or stands, hidden solar panels are integrated into the structure of buildings or camouflaged within the landscape to. The Swiss startup Sun-Ways is piloting an ingenious new system for hiding large arrays of solar panels in plain sight, in between the ties of railroad tracks. Local opposition to new solar.
