# Can I bring an solar container outdoor power to Riga

## Overview

---

Baltic Container Terminal (BCT), which operates in the port of Riga, has invested more than €1 million (US\$1.1 million) in the construction of a new solar panel power plant, which will eventually replace part of the electricity required for the company's operation with. By investing more than one million euros, the company SIA "Baltic Container Terminal" (BCT), operating in the port of Riga, has built a new solar panel power plant, which in the future will replace part of the electricity amount, necessary for the company's operation, with green energy. Some 1,974. Our containers are equipped with high-efficiency solar panels designed for maximum power generation in compact spaces. These panels are mounted directly onto the roof of each container, with optional IoT-enabled tilt mechanisms that optimise the angle throughout the day to capture the most. Hydroelectric power is the main source of renewable electricity in Latvia, followed by solar, wind and biomass cogeneration plants. In 2024, solar power in Latvia grew over 3. On 9 September, an agreement was signed between the Freeport of Riga Authority and Lithuanian company SNG Solar for the lease of land in the Spilve Meadows area of the port. H2 in Latvia is also being actively developed. 8 kW have been installed on the roof of the warehouse complex. The project, which was launched.
