Can I install photovoltaic panels on a house without a roof

**Low Voltage
Lithium Battery**

6000+ Cycle Life

Overview

Solar panels don't have to be installed on a roof —if you have the property, you can install them on the ground. The most obvious way to get solar energy to your house is to install panels on your roof. But roof panels have one big disadvantage: They are attached to your roof. This can complicate roof repair, maintenance, and replacement—and not all roof systems are ideal for solar panel placement. Maybe you live in an apartment where drilling into a shared roof isn't allowed. Or you. Installing your own solar panels can be legal and cost-effective, but navigating the regulations requires careful planning.

Can I install photovoltaic panels on a house without a roof
