

## PEES Power Systems

**Can I sell the electricity  
generated by my own  
photovoltaic panels**

## Overview

---

Solar net metering is a smart, rewarding way to get the most out of your solar panel system. It works by sending extra electricity your panels produce back to the power grid, sometimes even letting you sell solar energy back to the grid. The reality is more nuanced but equally beneficial. In return, you earn credits that can lower your utility. Customers frequently ask, “ Can I sell my solar electricity?

” Beyond this simple question, there are often follow-up questions about how much you can sell your excess solar energy for, who you can sell it to, and more. In this convenient guide, we'll walk you through all of the important details. As solar energy becomes more popular, many homeowners are finding ways to turn their solar panel systems into a source of income by selling power back to a utility company. However, the way that you can earn income from excess solar power is through net metering.
