Overview

The short answer is yes - a fully solar powered house is not only possible but increasingly practical for most homeowners. Modern solar technology has reached a level of efficiency and reliability that makes complete grid independence achievable in virtually any climate. Like any water heater, refrigerator. Not only do solar panels increase your home's value, but they also lower or completely eliminate your electric bill, and reduce your carbon footprint at the same time. The most popular time to buy a home is from March to June, so if you're currently looking to buy a new house, you'll probably come. Going solar can lower your home's carbon emissions and save you money on utility bills, but there are some things you'll want to know before buying a home with solar panels.
