

PEES Power Systems

Can solar power be used privately

Overview

Most people with solar panels still buy some power from the utility, but it's usually less after they go solar. Making your own electricity without interference is a basic property right. Common law allows you to do what you want on your property as long as it doesn't. Creating your own system and connecting to the energy grid Customers who produce their own energy from renewable sources can earn a credit on bills. Individuals, small businesses, large companies, and municipalities can all choose to build and operate privately owned energy systems that connect to. In the early 1900s, the government granted private utility companies like PG&E a monopoly over the electric grid. They did this in order to prevent ugly and duplicative poles and wires. They also receive a credit for excess energy produced that goes back onto the grid. Will my solar home be affected by power outages?

. Let's face it - your neighbor's rooftop panels suddenly look small potatoes now that private solar power plants are becoming the new backyard swimming pool of the 2020s.
