# Can solar power generators be connected to home lights

**51.2V 150AH, 7.68KWH**

## Overview

---

A solar generator cannot be plugged directly into the home's electrical panel. Solar power generators are becoming a popular backup power solution for homeowners who want quiet, clean, and maintenance-free energy reliability. The generator stores solar energy in a battery, and when the power. Connecting your lights to a solar generator that operates on a 12V system is not just a smart move for energy efficiency, but it's also a step towards a more sustainable lifestyle. In this guide, we'll show you how solar panels and backup power systems work together, so you can choose the setup that gives you the most comfort.
