Cell tower power problems

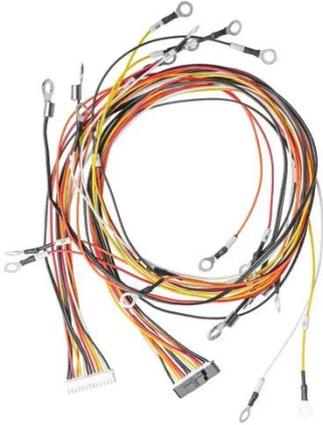

Overview

Cell towers may go down during power outages due to failures in backup power systems, network congestion, dependencies on infrastructure, and maintenance challenges. Sign in to see if there are any service outages for your address or account. Several factors contribute to this phenomenon.

Power Supply Failures If a power outage affects the entire grid or a significant portion of it, some towers may not have access to backup. The map below depicts the most recent cities in the United States where T-Mobile users have reported problems and outages. The heatmap above shows where the most recent user-submitted and.
