Colombia electric vehicle safety

Overview

Colombia has specific regulations for electromobility, including vehicles and charging infrastructure (Decree 948, 697 and PND 2022-2026 National Strategy of Electric Mobility). Incentives include Law 1964 of 2019 establishes incentives for zero-emission vehicles (0% taxes and sustainability measures across key Latin America markets. By examining each country's framework and leveraging local experience and insight, this guide aims to empower businesses to make informed decisions and identify EV/HEV opportunities if they qualify for a specific use case. Colombia is aiming to have over 600,000 electric vehicles on its roads by 2030, as part of its National Electric Mobility Strategy. This goal aims to reduce fossil fuel dependency, improve air quality, and protect public health. The transition goes beyond adding new vehicles. Colombia is. For transport, the target is supported by several mitigation measures in the transport sector, including the electrification of road vehicles.

Colombia electric vehicle safety

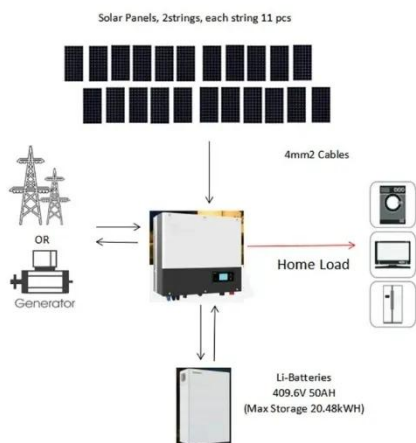

EV Regulatory Compliance Across Latin America and the United ...

HEVs are defined as motor vehicles that, for their mechanical propulsion, are powered by energy from both consumable fuel and an electrical power or battery storage device, located in the vehicle itself.
