Dakar maintains photovoltaic power station

Overview

The Diass Power Station (French: Centrale solaire de Diass) is a 23 MW (31,000 hp) solar power plant in Senegal. The power station was commissioned on 22 May 2022 by the President of Senegal Macky Sall and his guest Olaf Scholz, the Chancellor of Germany. The solar farm is owned and operated by. 29. In operation since November 2017. Combining solar panels with advanced battery systems, this hybrid solution addresses two critical challenges: The project's design includes: Traditional solar. The grid-connected PV project in Kaél was commissioned on and comprises the construction and operation of a large-scale photovoltaic system with 35 MWDC in Kaél, Mbacké department, Diourbe region, Senegal. The solar power plant covers an area of around 30 hectares and is equipped with. The plant, which is located 40 km south of the capital of Dakar in the department of M'bour, will supply 33,000 Senegalese households, saving Senegal's national electricity company SENELEC an estimated \$2. Think of it as a giant "energy bank" - storing surplus renewable power during sunny days and releasing it during peak demand or cloudy.
