

PEES Power Systems

Djibouti enphase energy

CE UN38.3 

Overview

The peak annual demand in 2014 was about 90 MW but is expected that it will grow to about 300 MW by around 2020. Electricity supply services are provided through the vertically integrated utility Electricité de Djibouti (EDD). A small amount of additional energy is generated by a solar plant (300 kW capacity). Djibouti has wind and geothermal generation potential and is actively studying these options. Djibouti's Vision 2035 aims to achieve universal electricity access and power the nation with
