

PEES Power Systems

Does China restrict solar power generation

Overview

In the first half of 2025, the curtailment rate for solar power reached 6.9% during the same period of 2024. Wind and solar surpassed a quarter of China's electricity generation for the first time in April 2025. China is the largest market in the world for both photovoltaics (PV) and solar thermal energy. 47 At year end, total solar power capacity. By virtually any metric, China is undeniably the world's solar superpower. Guided by its goals of peaking carbon emissions before 2030 and achieving carbon neutrality by 2060, the country is rapidly reshaping its power.

Does China restrict solar power generation

China's solar power capacity is on course to surpass coal this year

China's solar generating capacity is expected to surpass coal for the first time this year, according to the country's top electricity industry group, marking a milestone in the country's

How China adds more renewable energy than any other economy

China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout has its challenges. Here's what we can learn

China stops publishing data highlighting solar power constraints

BEIJING - China appears to have stopped publishing data that highlights the extent to which power generated by solar and wind plants is being wasted, as rapid renewable energy expansion

China builds more utility-scale solar as competition with coal ramps up

China is showing signs of a shift toward more utility-scale solar in suitable regions, and it is making substantial progress in deploying massive volumes of solar capacity, but powerful structural hurdles ...

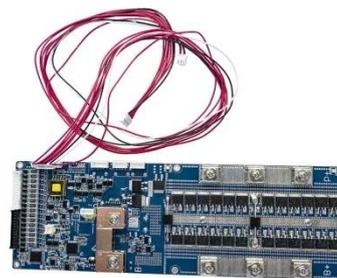

Solar energy in China

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic solar capacity to reach its climate target .

Solar power in China

The government incentives have also contributed to the curtailment of solar energy, as many of the solar projects have been built in northern and western regions of China where there is a low demand for electricity and a ...

State of global solar energy market: Overview, China's role, ...

Dominating the solar industry

encouraged China to set some trade quotas and restrictions that put the supply chain of solar PVs, and thin film PVs in particular, at great risk.

C: Solar Power

Photovoltaic (PV) technologies dominate China's solar industry, with roughly 99% of China's solar power capacity. Chinese PV manufacturing accounts for the vast majority of global PV production.

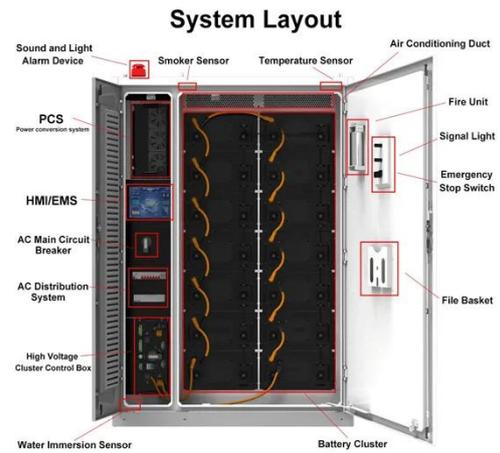

China Rules Solar Energy, but Its Industry at Home Is in Trouble

Over the past 15 years, China has come to dominate the global market for solar energy. Nearly every solar panel on the planet is made by a Chinese company. Even the equipment to

China faces rising renewable energy curtailment

China has a national curtailment limit of 10% for renewable energy, relaxed from

5% in 2024 as the integration of increasing renewable energy into the grid became more challenging.
