Earthquake-resistant energy storage cabinet for drilling sites

LFP 48V 100Ah

Overview

Seismic rack cabinets are robust enclosures designed for use in earthquake-prone areas. These cabinets feature reinforced steel structures and specialized connection elements to withstand shocks and vibrations, protecting servers, network devices, and other critical equipment. The enclosures are loaded with simulated equipment and placed on a shaker table designed to replicate the force of an earthquake. side-to-side, front-to-back) are tested to ensure that the heavy-duty steel welding is up to its task.
