Earthquake-resistant outdoor cabinets for sports stadiums

Overview

Seismic cabinets are built with structural reinforcements that allow them to remain stable during intense motion. Certain environments require extra protection for rackmounted equipment. Whether your venue is earthquake-prone or subject to regular vibration, such as an airport or factory, a seismic enclosure may be the answer for keeping equipment safe. Eaton Seismic Cabinets are performance-tested to. The use of seismic-rated enclosures is recommended in areas where earthquake activity or excessive vibration is possible. These areas include Telcordia Seismic Zones, power plants, railroads, airports and other installations use rack-mounted electrical and electronic equipment that is subjected to. In many cases, millions of dollars worth of technology depend on the quality and installation method of the seismic rack that it is stored in. When severe tremors occur, they can pose a significant threat to your operation's servers. If Belden's Server and Switch Cabinets are certified to Seismic Zone 4 requirements, passing vibration and shock testing per GR-63-CORE Network Equipment Building System (NEBS) requirements with no structural damage in a certified lab.
