# Ecovacs photovoltaic panel cleaning machine

## Overview

---

Capable of cleaning commercial and utility-scale solar photovoltaic panels up to a 75-degree angle, the RAYBOT safely sweeps, blows and vacuums the panels to remove dust and dirt, ensuring that the maximum amount of sunlight is exposed to the panels to produce energy. These devices are marvels of engineering: They are Autonomous: Using a combination of sensors and smart navigation, they can map out your specific solar array and clean every panel without human intervention. They Use a “Dry Clean” Method: Most use soft, rotating microfiber brushes to gently whisk. Check each product page for other buying options. Price and other details may vary based on product size and color. Need help?

Upgrade your solar panel maintenance with our versatile cleaning kits. With the potential to improve energy output by 30% through effective dirt removal, these systems are essential for both commercial and residential applications. Maintaining the efficiency of solar panels is crucial for maximising energy output, especially in large-scale. Discover the 7 best solar panel cleaning tools to maximize energy efficiency and extend system life.
