Electric vehicle incentives bulgaria

Overview

No purchase subsidies are currently available for battery electric vehicles in Bulgaria. Battery electric vehicles, including cars, motorcycles, mopeds, and vehicles of categories L5e, L6e, and L7e (as defined in Regulation (EU) No. Battery. While Bulgaria's business is exploring the EV market and the opportunities it offers, the Bulgarian Government faces a lot of changes if it is to make this segment attractive to the wider population. What EVs have been deployed in your jurisdiction to date?

EVs represent a small proportion. The potential introduction of subsidies for the purchase of electric cars in Bulgaria should be in line with the spending priorities of the state and the actions to achieve fiscal consolidation of the budget, according to Finance Minister Temenuzhka Petkova, who took part in Question Time in. However, freedom of travel or access to seamless and easy charging across the country is a leading challenge for those wanting to own an electric vehicle.
