Electric vehicles cyprus

Overview

Electric vehicles represent just 0.7% of Cyprus's 865,654 licensed vehicles as of May 2025, whilst hybrid vehicles account for 6% of the total fleet, official data shows. Electric cars are becoming increasingly popular in Cyprus, driven by rising fuel costs, government incentives, and growing environmental awareness. As the country expands its charging infrastructure and promotes sustainable mobility, more residents and businesses are considering electric vehicles. An electric vehicle is a more elegant solution. It saves you money on every short trip, requires no warm-up, and doesn't pollute the air where you live. Yes, there are questions about long journeys and charging infrastructure. But for daily life on the road. The Council of Ministers approved a new €2.5 million electric vehicle incentive scheme on Wednesday, maintaining existing grant levels of up to €9,000 for electric cars and €7,500 for hybrid vehicles amid sluggish adoption rates. The scheme mirrors previous frameworks offered in recent years. Cyprus has launched the fourth phase of its electric vehicle grant scheme, with applications set to open on December 5 at 9am and close on December 9 at 9am, road transport department (TOM) officer Angelos Sofocleous said on Monday., President of the Cyprus E-Mobility Association. The numbers back him up: in 2024, the EV market share in Cyprus nearly doubled from 2.
