# Electricity generation netherlands

## Electricity generation netherlands

---

### Dutch electricity production rises 7% in first half of 2025

Production from fossil fuels, including coal and natural gas, increased, while electricity generation from wind declined due to lower wind speeds on land and at sea. Renewable ...

---

### Netherlands Electricity Generation Mix 2025 , Low-Carbon Power ...

Energy production includes any fossil fuels drilled and mined, which can be burned to produce electricity or used as fuels, as well as energy produced ...

### Facts & figures energy system

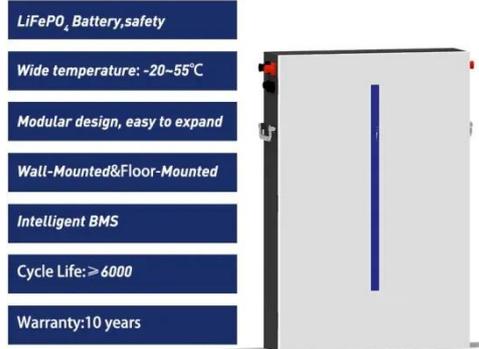

The chart above shows the real-time generation of electricity from wind and solar energy in the last 10 days, including what has been generated up to this moment in the day.

---

### Nearly half the electricity

## produced in the Netherlands is now

In 2023, 48 percent of electricity was generated from renewable sources such as solar, wind and water. Between May and July, over half of the electricity generated in the Netherlands was ...

↑ ESS

## Netherlands: power production share by source ...

Natural gas is the most used source for electricity production in the Netherlands.

## Netherlands Electricity Generation Mix 2025 , Low-Carbon Power Data

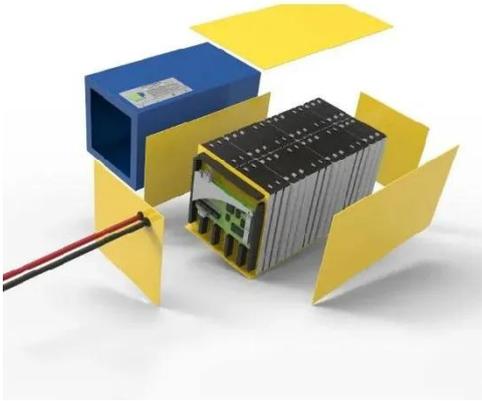

Netherlands's electricity mix includes 35% Gas, 23% Wind and 19% Solar. Low-carbon generation peaked in 2024.

## Electricity sector in the Netherlands

The generation and retail of electricity in the Netherlands were liberalized. However, transmission and distribution

are still centralized and operated by the system operator and utilities.
