## Overview

---

There are regulatory policies, such as the Gambia Validated Green Mini-Grids Policy Statement that clarify the options and arrangements for transfer of asset ownership and/or ongoing operation and maintenance, when the national grid envelopes a privately owned mini-grid system and. There are regulatory policies, such as the Gambia Validated Green Mini-Grids Policy Statement that clarify the options and arrangements for transfer of asset ownership and/or ongoing operation and maintenance, when the national grid envelopes a privately owned mini-grid system and. vide affordable, reliable and modern energy for all by 2030. This National Energy Compact provides the roadmap to a to reach universal access ahead of the SDG7 target of 2030. The process towards universal electrification is anchored on The Gambia's multi-year energy sector roadmap (2021-40) and. tial driver of economic growth. IRENA (2018) has estimated nat gion and the African continent. A gap between available capacity and peak demand is identified from 2022 with the expiration of the Karpower contract and by 2025 ectricity from Senegal and/or Cote d'Ivoire. Population: It is based on the de facto definition of population, which counts all residents regardless of legal status or citizenship--except for. Enter the Banjul Power Plant Energy Storage initiative—a game-changer for Gambia's energy resilience. This project isn't just about storing electrons; it's about safeguarding hospitals, schools, and businesses from blackouts that cost West African economies up to 2% of GDP annually [1]. The Public Utilities Regulatory Authority, a multi-sectoral regulatory institution that also regulates electricity, was established in 2001 by an act of parliament, the Public Utilities Regulatory Authority Act, 2001. The Electricity Act also focuses on electricity.
