# Enterprise solar power generation has low profit margins

## Overview

---

For solar panels for business installations, profit margins typically range from 15% to 35%, depending on various factors including project complexity, market competition, and operational efficiency. In our latest Short-Term Energy Outlook (STEO), we expect U. electricity generation will grow by 1.6% in 2027, when it reaches an annual total of 4,423 BkWh. The three main dispatchable sources of electricity generation (natural gas, coal, and nuclear) accounted for 75% of. Renewable energy companies profit margins shrank across the board in 2023, according to a report by AlphaSense. Please let us know if you have feedback. Revenue depends on local energy prices and solar irradiance levels. Financial metrics provide a snapshot view of a benchmark "average" company.
