## Overview

---

Flat solar photovoltaic (PV) panels are installed directly on the ground without the need for supporting structures or poles used with traditional panel systems. US-based energy technology developer, Erthos, is a clear example of a company investing heavily in flat PV panels. Ground-mounted solar panel systems usually cost about 51% more than rooftop solar, according to 2026 EnergySage data. You need a lot more equipment, which adds up. But ground-mounted panels also let you dial them into exactly the right direction and angle to maximize sun exposure, which can. What are the advantages and drawbacks of installing flat solar photovoltaic (PV) panels without a fixed or tracker mounting structure?
