Foldable containers extend delivery time

Overview

Foldable plastic containers reduce their volume by up to 70-80% when folded. This is particularly advantageous for companies that must ship empty containers back for reuse—such as suppliers, distributors, and third-party logistics providers. These. TEUs of containers being stored empty waiting to be used of all global port handling are empty containers spent annually by shipping industry to reposition empty containers Why Fold?

The repositioning of empty containers is one of the most complex problems in global freight distribution today. Constructed from durable yet flexible materials, these containers are designed with hinges and locking. A foldable plastic container is a robust storage and transport box made primarily from plastics such as polypropylene (PP) or high-density polyethylene (HDPE). A foldable shipping container saves up to 75% of the cost associated with empty containers.
