Georgia Energy Storage Plan

Overview

On Jthe Georgia Public Service Commission (PSC) approved the 2025 Integrated Resource Plan (IRP), which details the company's plan to meet the energy needs of customers and support the state's expected continued extraordinary growth. As Georgia continues to grow and the energy landscape rapidly evolves, one thing remains constant—we understand the important role we play in serving millions of Georgians and take our commitment to serving them seriously. Courtesy of Georgia Power This audio is auto-generated. Please let us know if you have feedback. The plan aims to expand renewable energy. Georgia Power is seeking 500 MW of energy storage with a minimum of 500 MWh to support its renewables expansion, as part of its 2022 Integrated Resource Plan (IRP).

Georgia Power's 2025 IRP: Further shift towards battery storage

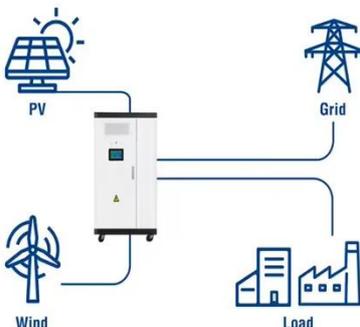

US utility Georgia Power has filed its 2025 update to its Integrated Resource Plan (IRP) with the first update since 2023 showing further acceleration in the utility's adoption of (BESS).

Peach State power play: Georgia's blueprint for grid-scale energy storage

Georgia is on track to deploy more than 1GW/4GWh of utility-scale storage by 2027, outpacing every other Southeastern state. Driven by economic growth and evolving grid ...

Utility-Scale ESS solutions

Georgia PSC Approves 500 MW Battery Storage Plan

The Georgia Public Service Commission (PSC) has approved a significant expansion of the state's energy storage infrastructure, green-lighting a plan for Georgia Power to install 500 megawatts (MW) ...

Integrated Resource Plan

Read the latest Integrated Resource Plan filings to see how Georgia Power is planning to meet Georgia's growing energy needs responsibly.

Georgia energy storage: Power Seeks Impressive 500 MW Deal

In a decisive move to bolster its clean energy capabilities, Georgia Power has announced a request for proposals (RFP) to procure 500 MW of energy storage, with a minimum capacity of 500 ...

Georgia Power requests PSC permission to build

Georgia Power has requested certification from the Georgia Public Service Commission (PSC) for 9,900MW of new generation resources, including more than 3GW of battery storage that ...

Construction now underway on 765 MW of new battery energy storage

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, ...

PSC approves Georgia Power's long-term energy plan to meet state's

The plan aims to expand renewable energy capacity by procuring up to 4,000 MW by 2035 and integrating over 1,500 MW of battery energy storage systems, enhancing Georgia Power's ...

Georgia Power seeks 500 MW storage, possibly with renewable ...

Georgia Power is seeking 500 MW of energy storage with the ability to discharge for at least two hours, either standalone or with associated renewable resources, the utility said Tuesday.

Georgia Power's Shift to Gas and Grid-Scale Storage: Strategic and

For investors, the question is whether Georgia Power's reliance on gas and grid-scale storage aligns with the broader shift toward renewables--or if it represents a costly detour in an ...
