

PEES Power Systems

Go to the market to sell solar power

Overview

The demand for solar power is growing rapidly, presenting significant opportunities for entrepreneurs in the solar sales industry. This comprehensive guide aims to provide you with detailed insights and strategies to sell solar panels effectively. Self-consumption beats exports - Maximizing the solar electricity you use directly in your home typically provides better financial returns than exporting excess to the grid, especially with time-of-use rates and battery storage becoming more common in 2025. Federal tax credit uncertainty looms -. You can sell excess solar energy back to the grid through net metering programs, earning credits worth \$0. According to the Solar Energy Industries Association (SEIA), properly configured solar systems can generate 25-40% excess energy during peak production. More homeowners and businesses want to switch to clean, renewable power, but competition in the solar industry is fiercer than ever. You need clever strategies, helpful tools, and a positive attitude to succeed.
