## Overview

---

Ground-mounted distributed solar involves installing solar PV panels on the ground, often in smaller arrays than utility-scale projects, and connecting them directly to the local electricity grid or using them to power a specific building or microgrid. The SolarEdge TerraMax™ Inverter, paired with H1300 Power Optimizers, delivers up to 330kW of power, setting new standards for energy yields, module level visibility, and O&M savings. It handles high. Solis is one of the world's largest and most experienced manufacturers of solar inverters supplying products globally for multinational utility companies, commercial & industrial rooftop projects, and residential solar systems. It's a device that converts direct current (DC) electricity, which is what a solar panel generates, to alternating current (AC) electricity, which the electrical grid uses. These products cater to a wide range of.
