# How long does it take to install rooftop photovoltaic panels

## Overview

---

The good news is that installing the panels on your roof only takes a day or two. It's just every other part of the process—designing the system, securing permits, connecting to the grid, and final inspections—will take some time. However, the timeline can vary depending on a few factors, including how complex your. While panels may only be on your roof for a short time, the full process includes planning, design, permitting, inspections, and utility approvals — all of which are essential for safety and long-term performance. Let's take a closer look at this process and provide you with a timeline, including a detailed description of each step. Solar panel installations will take somewhere between two. If you've decided to get rooftop solar panels, be patient — it'll take a few months before you see those savings in your electric bill.
