

## PEES Power Systems

# How many companies have installed photovoltaic panels

## Overview

---

As of January 2024, IBIS World estimates that 11,091 solar panel installation companies are operating in the United States. With a secure supply chain backed by tax incentives, this number will rise as both the commercial and residential market continues to grow. Modern solar energy development in the United States dates back to 1954 when scientists at Bell Laboratories patented the first silicon solar cell. is now the second leading consumer of solar energy. The US solar industry installed 11.7 gigawatts direct current (GWdc) of capacity in Q3 2025, a 20% increase from Q3 2024, a 49% increase from Q2 2025, and the third largest quarter for deployment in the industry's history. 4 billion over the past five years, including a 3. While China continues to dominate the US in terms of market share of solar panel manufacturing, public policy and public interest in reducing carbon. Led by tech and retail giants, American companies are installing record levels of solar to power their operations and now account for 14% of all installed solar capacity in the United States, according to the Solar Means Business 2022 report released by the Solar Energy Industries Association.
