# How much does a lithuanian energy storage project cost

## Overview

---

Lithuania has announced a EUR 102 million (\$ 105 million) energy storage tender in a bid to procure balancing services to the transmission system operator and ensure the resilience of its grid. The Ministry of Energy issued a call for applications for companies to install high-capacity energy. The government is ready to assist with the acquisition and installation of lithium iron phosphate or lithium-ion electric energy storage systems with a capacity of up to 500 kWh. It is envisaged that the costs of installing an individual electric energy storage system will be covered by a fixed. Lithuania can move ahead with a scheme to provide €180 million (US\$200 million) in grants to energy storage projects after it was approved by the EU. 2GWh of energy storage projects.
