# How much power can the solar container battery hold

## Overview

---

Each container carries energy storage batteries that can store a large amount of electricity, equivalent to a huge “power bank. ” Depending on the model and configuration, a container can store approximately 2000 kilowatt-hours. A 12v/24v auto air con may fit your space. There is a decent cost difference between a small inverter to use occasionally vs a 3000-5000w inverter running all the time. For a total of 120 kWh, you may need 12 batteries. The usable capacity depends.
