How often should the base station power supply be replaced

Overview

Replace your PSU every 5-10 years based on warranty. Consider upgrading your PSU with significant component upgrades. Watch for signs like blue screens, noises, and performance dips. We often neglect our computer's power supply. Knowing when to change your power supply is essential for maintaining the health, efficiency, and reliability of your computer. Only reason I would upgrade a PSU is: Lots of people comment saying to replace it with no reason other than it's past warranty, I disagree. Barring catastrophic failure a failed PSU is contained within. A good quality PSU should last 50+ years assuming that it runs at reasonable temperatures and humidity levels. On 4/28/2021 at 12:26 AM, Enderman said: Capacitors, resistors, transformers, etc. How Long do LED Drivers Last?

 Designed to power LED lights for 50,000 to 100,000 hours.
