# How to cut the photovoltaic panel trough

## Overview

---

Drill round holes in the corners, use shears, preferable "power" ones to cut the opening. Even better if you can cut the opening undersize and bend the edges to create a rounded surface that will not cut you or the wire insulation to shreds if you somehow touch it. Solar Panel Cutter: Easy and Efficient Cutting! - YouTube Discover how to use the solar panel cutter for precise and effortless cuts! Perfect for DIY projects and solar enthusiasts. Let's slice through the details!. Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! I'm in a flood-prone area, so need to elevate my equipment at least a foot off the floor. Stacking up a wall mount battery, trough, and EG4 12000XP things are getting pretty high. To save height, I'd like to. deare applicable for photovoltaic (PV) systems. More specifically, Part IV of Art. Ensure a proper connection an use the crimping. Before starting the disconnection process, shut off the DC and AC circuit breakers so there's no electrical load connected to the solar panels. For example, if you split a solar panel into two halves of 0.
