How to find a OEM for energy storage lithium batteries

Voltage range:691.2-947.2V

>6000 cycles(100%DOD)

Rated battery capacity:
216KWH (customizable)

EMS communication:
4G/CAN/RS485

Overview

Selecting a reliable OEM lithium-ion energy storage supplier requires rigorous evaluation against specific criteria. Technical capability is paramount; assess the supplier's expertise in cell chemistry (LFP, NMC), battery management systems (BMS), thermal management, and system. Think of the energy storage supply chain as a giant network working together to create massive power banks. Upstream, we have the raw materials and components. Here, manufacturers build the equipment and put the systems. As businesses and consumers alike seek sustainable solutions, finding a reliable OEM (Original Equipment Manufacturer) for energy storage batteries becomes crucial. China dominates production, particularly within Guangdong province (Shenzhen, Dongguan) and Jiangsu province.
