# How to lift the photovoltaic panel

## Overview

---

To lift solar panels onto your roof, you can use a ladder railing system, a pulley system, a lifting bag, or even DIY lifting systems using a pulley. Carrying them up the ladder can also be done with products like the solar panel caddy, and all of these ideas will make this task. Lifting solar panels to your rooftop can be risky without the right technique! In this video, I show you a simple, safe, and effective method to get your solar panels up without damaging them or risking injury. If you're planning to DIY your solar project, make sure you consider this part of the process. Solar Panel lifting requires an exact and careful approach to protect panels and. Using a gravity-based locking mechanism, with the extra assurance of a safety block for accidental disengagement, you'll clamp the caddy around the frame of the solar panel in landscape orientation with the cell side facing away from you. Squat, lift up and hold the panel near the midsection of.
