

PEES Power Systems

How to trigger the power cord of the battery cabinet

Overview

Mount a power strip inside the lower back cavity of the cabinet with screws. use a voltmeter to verify that no voltage or the expected voltage is present. Check for voltage with both AC and DC voltmeters prior to making connections. If the voltage is not hazardously high, the battery can deliver large amounts of current. Exercise extreme caution not to. Do not drill or punch holes with the gland plates installed and do not drill or punch holes in close proximity to the battery cabinet. That way, they're always energized but without a "spaghetti junction" of cords to see or fiddle with. When connecting servicing should be performed by qualified Simplex power to this system.

How to trigger the power cord of the battery cabinet

Battery Charger Cabinet Project Plan

Mount a power strip inside the lower back cavity of the cabinet with screws. Feed the power strip's cord down through the grommet in the cabinet bottom (right photo above).

-48 VDC Battery Cabinet Installation and User Manual (Section ...

Connect the power system's battery cable terminated in an Anderson connector to the first battery cabinet's battery cable terminated in a mating Anderson connector.

How to trigger the power cord of the battery cabinet

Set fourth battery in cabinet (being careful of the door fastener tabs hanging down) and attach the other end of the fast-on lugged cable to the negative terminal on the third battery (fast-on terminal).

PROJECT: Tool Battery Charging Cabinet

Set the chargers into place in the cabinet, and thread their cords through the back-panel holes. I used 1-1/4" washerhead pocket screws to fasten the upper back panels to the cabinet cleats.

...

Connect the Power Cables
