Huawei 5kW battery dimensions

Overview

Lightweight design: The battery weighs 63 kg. Its simple and clean design allows for easy installation. The actual capacity may vary depending on the environment conditions, such as temperature, transportation conditions, and storage conditions. Storage system is ordered and delivered in the form of power module and battery module separately with corresponding quantity. To work it needs a control BMS that you can find here. It requires a BMS and is compatible with various self-consumption inverters, including single and three-phase inverters. The Huawei. The Huawei LUNA2000 5kWh battery is designed for home use. Creates an intelligent energy storage system. It is characterized by a unique appearance, has a modular structure and allows flexible extension of power from 5. *1 Test conditions: 100% depth of discharge (DoD), 0.2C rate charge & discharge at 25°C, at the beginning of life.
