

## PEES Power Systems

# I don t want to install photovoltaic panels anymore

## Overview

---

Explore the five reasons why you shouldn't make the move to solar now.  If you prefer not to install solar panels at your residence, there are numerous alternative options that can assist in managing energy costs and enhancing energy. This guide explains your rights and potential ways to resolve your contract. Solar panel agreements are significant, long-term financial commitments that lock homeowners into terms that can span two decades or more. These contracts, whether a lease, loan, or Power Purchase Agreement (PPA), carry. On first inspection, you might think it bonkers that someone wouldn't want solar panels. After all, they produce free and clean electricity. A few of these people expressed their reservations about going solar on the Reddit forum r/solar when asked “ What turns people off on the idea of switching to solar?

We rounded up some of the most. In 2024, installing residential solar panels in the United States typically demands an upfront investment of around \$20,000 before incentives even come into play. While the federal solar tax credit can slice that total by 30%, the out-of-pocket expense remains daunting for many households.
