# Indian photovoltaic panel tariffs

## Overview

---

On Febru, the nations struck a deal to reduce reciprocal tariffs on Indian goods, including solar modules and energy storage components, from 25% to 18%. For developers, relief comes from the removal of penalties. Few details were actually provided, but new reports say that the United States is lowering India's export tariff to 18%. It was previously as high as 50%. Interestingly, the trade deal came weeks after the US pulled out of the International Solar Alliance, backed by India. "The. Tariff reductions under the new U. The Visakhapatnam port in India Image: eclicks\_by\_bunny, Wikimedia Comian, CC BY-SA 4. US president Donald Trump said India would, in return, cut tariffs on US goods to zero and. The United States and India have announced a trade agreement under which Washington will lower tariffs on Indian goods from 25% to 18%, with the potential for a waiver of an additional 25% tariff imposed due to India's imports of Russian oil.
