Industry and market trends freetown

Overview

Freetown, the capital city of Sierra Leone, is experiencing a dynamic shift in its job market as we move into 2024. The city's economy is primarily driven by industries such as mining, agriculture, and services, with emerging sectors like technology and renewable energy. ACRC has published a new report examining the politics, systems and key urban development domains in Freetown, Sierra Leone. It highlights how national, city and domain-level power and politics interact and the implications for solving intractable development challenges in Freetown. With a population now in excess of 1.2m residents, Freetown generates approximately 30% of the national GDP whilst housing 15% of the national. In 2025, the city of Freetown, Sierra Leone, was selected as a grantee of the Global Cities Fund for Migrants and Refugees (GCF), the MMC's instrument to channel international funding directly to cities to implement inclusive projects of their own design. With support from the GCF, Sierra Leone is. By conducting insightful market research, we empower entrepreneurs with a deep understanding of consumer needs and industry trends, enabling the development of effective business strategies. We envision a Sierra Leone where armed with this knowledge, entrepreneurs develop innovative strategies. This report provides detailed insights at the city level. The report also covers both modern and traditional trade, including.
