Overview

The Residential Clean Energy Credit allows homeowners to claim a tax credit for 30% of the cost of installing renewable energy systems, including energy storage solutions like battery systems paired with solar panels and solar water heaters. The most lucrative tax credit currently available is the federal solar tax credit, but it's set to end. With the federal solar tax credit ending much sooner than expected — you now only have until Dec. We're here to help you navigate. From solar tax credits to state-specific rebates and utility-sponsored programs, there's a wide range of green energy incentives available to help homeowners and businesses make the switch. Here's your up-to-date guide to the most important incentives in 2025 — and how to take advantage of them.
