# IoT base station uses African energy storage cabinet for communication

## Overview

---

Meet the communication base station energy storage cabinet - the industrial equivalent of a superhero's utility belt. This initiative delivers high-performance off-grid/backup power solutions for indoor telecommunications rooms and data sites. A total of 7 sets of equipment have been installed.

**Project Introduction** This project is located in Mauritania, Africa, providing an integrated power solution for local. Base station operators deploy a large number of distributed photovoltaics to solve the problems of high energy consumption and high electricity costs of 5G base stations. This study suggests an energy storage system configuration model to improve the energy storage configuration of 5G base stations and ease the strain on the grid caused by peak load. Here, we provide a comprehensive review on recent research on en. [pdf] This paper proposes a control strategy for flexibly participating in power system frequency.
