# Is it good to have photovoltaic power generation in outdoor base stations

## Overview

---

We tested 100+ watt solar panels from Goal Zero, Jackery, Ecoflow, BigBlue, Renogy, and more for RVs, camping, and to charge power stations. The communication base station installs solar panels outdoors, and adds MPPT solar controllers and other equipment in the computer room. The power generated by solar energy is used by the DC load of the base station computer room, and the insufficient power is supplemented by energy storage. Building a reliable foundation for outdoor photovoltaic (PV) systems is like laying the cornerstone of a skyscraper—it determines long-term performance. You gain efficiency and stability by using this technology, which adjusts to changing sunlight for maximum output. Reliable power management keeps telecom networks running, even in.
