Jamaica Container solar House

Overview

In Jamaica, container homes are insulated and reinforced to withstand the island's climate, with options for customization such as interior finishes, exterior cladding, and the inclusion of facilities like air conditioning and solar panels. These homes are modular constructions made from repurposed shipping containers that are prefabricated and assembled to create living spaces. Originally popularized in the Netherlands in the 1990s as student housing, they have since gained global traction. They come in standard sizes of 20 and 40. Prime Minister Dr Andrew Holness speaking at a special media briefing at Jamaica House in St Andrew on Friday, October 24. This initiative is a crucial part of the Hurricane Melissa Relief Mission, led by Custos of Clarendon, Edith Chin, bringing vital support to impacted communities and showcasing. The Government has determined it will use "pre-built containerised modular solutions" as it seeks to rapidly rebuild the housing stock destroyed by Hurricane Melissa.
