

## PEES Power Systems

# Lithium-ion battery technology tehran

12.8V6Ah

Nominal voltage (V):12.8  
Nominal capacity (ah):6  
Rated energy (WH):76.8  
Maximum charging voltage (V):14.6  
Maximum charging current (a):6  
Floating charge voltage (V):13.6~13.8  
Maximum continuous discharge current (a):10  
Maximum peak discharge current @10 seconds (a):20  
Maximum load power (W):100  
Discharge cut-off voltage (V):10.8  
Charging temperature (°C):0~+50  
Discharge temperature (°C): -20~+60  
Working humidity: <95% R.H (non condensing)  
Number of cycles (25 °C, 0.5c, 100%dod): >2000  
Cell combination mode: 32700-4s1p  
Terminal specification: T2 (6.3mm)  
Protection grade: IP65  
Overall dimension (mm):90\*70\*107mm  
Reference weight (kg):0.7  
Certification: un38.3/msds

## Overview

---

TEHRAN (ANA)- Iranian technologists at a startup team presented an innovative solution to overcome the limitations of conventional lithium-ion batteries by using solid polymer electrolytes containing metal-organic nanostructures which can affect the future of electric vehicles and. TEHRAN (ANA)- Iranian technologists at a startup team presented an innovative solution to overcome the limitations of conventional lithium-ion batteries by using solid polymer electrolytes containing metal-organic nanostructures which can affect the future of electric vehicles and. At ESL, we are dedicated to advancing the frontiers of energy storage technology through innovative research and development in lithium-ion batteries, silicon anodes, solid-state electrolytes, supercapacitors, and nanostructured materials. Energy Storage Laboratory (ESL) began its work on Li-ion. Iran has officially embarked on developing commercial lithium-ion batteries, driven by rising global demand and the country's increasing focus on renewable energy and electric vehicles. The Energy Storage Laboratory of the School of Electrical and Computer Engineering, University of Tehran is the most comprehensive scientific center in this field in the country, which works on new batteries for electric vehicles, and paves the way for expansion of the use of electric vehicles in. TEHRAN - The Iranian Ministry of Defense inaugurated its cutting-edge lithium battery pack production line on Monday. The project, considered a significant milestone, was overseen by Defense Minister Brigadier General Mohammad Reza Ashtiani. The launch of the lithium battery pack production line. TEHRAN, Jan. 09 (MNA) - In a bid to help the country achieve self-sufficiency in the field of lithium-ion battery cells used in electric vehicles, the Iran Space Research Center succeeded in designing and manufacturing the first such battery cells.

---

### Innovative approaches to lithium extraction in Iran: Assessing ...

Brine-based recovery techniques are economically viable and sustainable for lithium production. Research addresses high water consumption challenges with proposed sustainable ...

## University of Tehran

As a joint lab between the University of Tehran and Crouse Company, we have a special focus on the fabrication of lithium-ion batteries for automotive applications. Our mission is to bridge the gap ...

### Iran Expanding Lithium Battery Production Capacity

During the forum, defense ministry authorities said they have plans to commercialize electric vehicle battery production in Iran by expanding research centers and laboratories and by ...

## Iranian Defense Ministry launches largest lithium battery production

TEHRAN - The Iranian Ministry of Defense inaugurated its cutting-edge lithium battery pack production line on Monday. The project, considered a significant milestone, was overseen by ...

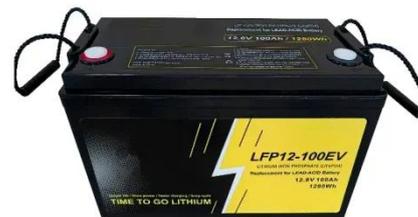

## Iran expanding lithium battery production capacity

TEHRAN, Jul. 10 (MNA) - Iran is planning to expand its home-grown infrastructure for production of lithium batteries to respond to the electrification needs in its automotive sector, a senior official in the ...

## battery technologies tehran

Natural Battery Technologies design, manufacture, supply and support lithium-ion battery packs for Electric Vehicles, Energy Storage Systems and Biomedical Devices.

## The world of new batteries

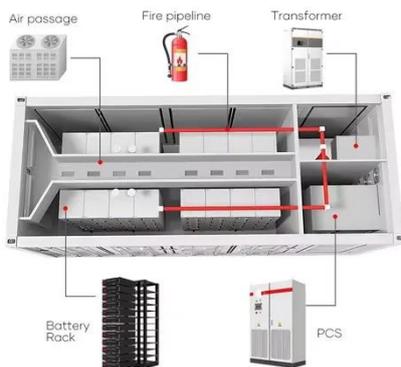

The main research direction of this laboratory is focused on production of lithium-ion batteries, currently the most

widely used rechargeable batteries in the world.

## Iran designs lithium-ion battery for electric cars

Designing and producing lithium-ion battery cells is one of the most important stages in the development of electric cars. This advanced technology is regarded as one of the overflow products ...

## Explainer: Iran's first lithium-ion battery line ushers in

Iran has officially embarked on developing commercial lithium-ion batteries, driven by rising global demand and the country's increasing focus on renewable energy and electric vehicles.

## Iran expanding lithium battery production capacity

TEHRAN, Jul. 10 (MNA) - Iran is planning to expand its home-grown ...

## Iranian Technologists Improve Safety, Capacity of Lithium Batteries

TEHRAN (ANA)- Iranian technologists at a startup team presented an innovative solution to overcome the limitations of conventional lithium-ion batteries by using solid polymer electrolytes ...
