

## PEES Power Systems

# Longi photovoltaic panels have color difference

## Overview

---

Because LONGi solar panels use half-cut cells, they perform well in most conditions. Half-cut cell technology allows the panels to essentially operate as two separate panels on the top and bottom, so if one half is shaded or damaged, the other half will be unaffected and. Satisfying the diverse needs of architectural aesthetics Inspiring building design Premium textured glass with multiple color choices Unique anti-glare design Perfectly matches module dimensions of the construction industry Free to mix and match, blooming architectural creativity Reliable 7-layer. Because LONGi solar panels use half-cut cells, they perform well in most conditions. LONGi's Hi-MO 6 series includes four models, each designed to meet different solar energy needs: The Artist: This model is for those who prioritise aesthetics. The Guardian: Ideal. However, LONGi managed to match the level of Sunpower, which produces the most efficient solar panels on the market today, using a new P-type Hybrid Passivated Back Contact (HPBC) cell design, which is similar to the well-known IBC cell design, the first solar company in the world to do so. 8%, and proven reliability in diverse climates 1. The differences between A and B class panels extend beyond surface appearances, impacting everything from energy output to financial return Ever wondered why.
