# Modular battery cabinet rack type for substations

## Overview

---

The modular battery racking system can be specified to accommodate any battery cell type. From flooded batteries to sealed, from lead-acid to nickel-cadmium, from vertical to horizontal mounting, a high density, space-saving rack can be provisioned. Exponential Power can size an appropriate battery. The modular design of the battery rack grid | XtremeStack keeps the footprint small and makes installation and commissioning easy. Standardized modules lead to fewer spare parts to stock and simplified system upgrades. Made from corrosion-resistant materials like steel or aluminum. Switchgear and substation power systems work together to deliver electric power and reduce potential downstream faults ensuring safe electrical power. However, its design addresses four fundamental pillars that directly impact the viability and total cost of ownership (TCO) of a battery system.
